

INDEX

1	Executive Summary	5
2	Structural Analysis of Global Data Storage and Prediction of Market Size.....	8
2.1	Changes in Global Storage Capacity and Archive Capacity	8
2.2	Cloud as Major Trend	11
3	The Current State of Optical Disc Archive in View of Market Trend Analysis.....	13
3.1	Archive Structure Analysis	13
3.2	Actual State of Archiving by Domestic Companies/Government and Public Users	15
3.3	Analyzing Past and Current Success and Failure of Optical Disc Storage.....	21
3.3.1	Examples of Past Failure of Optical Storage	21
3.3.2	Approach to Possibilities of Optical Disc Archive.....	23
3.3.3	Case Study of Optical Disc Archive	26
3.4	Possibilities of Optical Disc Market in Terms of Present Data Analysis.....	36
4	Proposal of New Archive Technology	39
4.1	Collaboration situation of each company.....	39
4.2	Media.....	40
4.2.1	Panasonic.....	40
4.2.2	TaiyoYuden/Bifrostec.....	41
4.2.3	Mitsubishi Kagaku Media	42
4.2.4	TDK.....	44
4.2.5	SONY	44
4.2.6	Milleniata (M-DISC)	45
4.3	Drive/System.....	46
4.3.1	SONY	46
4.3.2	Toshiba	46
4.3.3	NHK and other	47
4.3.4	Pioneer	48
4.4	Summary.....	48
5	BD standardization about estimation of the archival lifetime.....	49
6	Possibilities of Creating the Optical Disc Archive Market with New Concepts	50
6.1	Structural Change of Data Storage	50
6.1.1	Dynamic Background of Information Business.....	50
6.1.2	Data Archive Market Structure	51
6.2	Concept of IT Management	53
6.2.1	ILM Management Approach	53
6.2.2	New Concept Replacing ILM ~ RO-ILM	57
6.3	Archive Center as a Solution to Various Issues of Optical Disc.....	60
6.4	Paradigm Shift to Realize Optical Disc Archive with New Concept.....	65
7	Possible Optical Disc Archive Market Size with New Concepts.....	67
